Experience A SeeMore Putter

SeeMore solves the number one problem in putting. SeeMore's patented and proven RifleScope Technology (RST and RST2) is like having a gun sight on your favorite putter.

Better alignment. Better posture. Better stroke. Every time. More made putts. Hide the Red Dot. Line up the 2 white lines. Fire away. Standard or Counterbalance Length. It's that simple.

And SeeMore offers the best customer service in the industry. Tour level attention and instruction and advice. Ask anyone who already knows about SeeMore. Check it out online at SeeMore.com or ask your club fitter about SeeMore.

SeeMore. Not just another putter. A putting system that will help you find the best putting of your life. Forever.

Introducing SeeMore's RST Hosel Series

SeeMore's new RifleScope Technology (RST) Plumber Neck Hosel, (for short simply called the "SeeMore RST Hosel"), is a fluted barrel hosel that brings a unique approach to the classic off-set plumber neck design preferred by many golfers. It enables golfers who want their hands slightly forward, to take advantage of SeeMore's patented and proven RST alignment system, primarily associated with straight shaft or double bend offset putters up until now.

By hiding the red dot, using the lower portion of the new RST Hosel, golfers now have an exciting new option within the SeeMore lineup. The RST Hosel enters the head on a single plane angle, at 70 degrees, and the design offers an entry point of connection closer to the sweet spot than a standard Plumber Neck. This leads to improved feel and balance.
